PROFESSIONAL SUMMARY

Full stack developer who designs, builds and launches production web and mobile applications with React, Next.js, TypeScript, Node.js and PostgreSQL. Built and launched Upsoar, an AI SaaS product with 15 users and 5 paying customers, owning the UI, 46 API endpoints, database, deployment, payments and 64 automated tests. Uses Claude Code to ship faster, mainly for debugging and corrections, while owning product decisions, architecture, code review and testing. Seeking a Full Stack, Frontend or React Native developer role.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, HTML, CSS, SQL
Frontend	React, Next.js, responsive design
Backend	Node.js, Express, REST APIs, OAuth 2.0
Databases	PostgreSQL, SQLite, Firebase
Mobile	React Native, Expo, Android
AI	Claude API, agents and tool calling, prompt caching, model routing
Tools and services	Git, GitHub Actions (CI/CD), Vitest, Docker, Vercel, Razorpay, Stripe, WhatsApp Cloud API, Google Apps Script

EXPERIENCE

Freelance Full Stack Developer | Self-employed, remote 2026 – Present

- Replaced a skin clinic's paper register with a treatment tracker that sends WhatsApp reminders and counts sessions (Node.js, SQLite, WhatsApp Cloud API).
- Delivered a consultancy website whose enquiry form saves every lead to Google Sheets and emails the owner, with no server costs (Apps Script).
- Designed, built and launched the products below end to end: requirements, UI, APIs, database, hosting and payments.

Government exam preparation and IT upskilling | Career break 2020 – 2025

- Prepared for government exams while completing training in web development and Java full stack development.

PROJECTS

Upsoar, AI social media manager | upsoar.in 2026

Next.js, React, TypeScript, PostgreSQL, Claude API, Razorpay, Stripe, Vercel

- Launched publicly and grew to 15 users, 5 on paid plans, with billing through Razorpay (India) and Stripe (international).
- Built an AI agent with 5 custom tools and live web search that plans and schedules a week of posts from one request.
- Kept every plan profitable with Claude model routing, prompt caching and credit-based pricing.
- Integrated Instagram, Facebook, LinkedIn, X, Threads and Bluesky via OAuth 2.0 with AES-256 encrypted tokens.
- Wrote 64 automated tests running in a GitHub Actions CI/CD pipeline.

TradeWire, market news app for Indian traders | github.com/shaggyb1/tradewire 2026

React Native, Expo, TypeScript, SVG charts

- Shipped an Android app and website from one codebase across 7 releases; the source code is public.
- Aggregates RBI, SEBI, NSE and other official feeds and tags each headline by likely market impact and direction.
- Built option chain analytics for Nifty and 218 F&O stocks (PCR, max pain, OI, IV) with EMA, RSI and Supertrend charts.

Local Distributor, grocery delivery platform for villages 2026

JavaScript, Firebase, Android, Claude API

- Built customer and seller apps and a website in 13 Indian languages; a written or spoken list becomes a cart.
